

COVER FOR DVU 1-4 GI (LTE)

INTRODUCTION

The cover is used to make the installed DVU 1-4 GI or DVU 1-4 GI LTE appear neutral. The cover hides the DVU, as well as the cable connectors, so only the cables themselves are visible. In addition, the cover prevents unintended short circuits across the galvanic isolation of the DVU 1-4 GI as it hides all metal parts. The cover is easily snapped onto the DVU 1-4 GI or DVU 1-4 GI LTE after it has been installed on the wall; no extra screws are needed.

Parameter	Cover for DVU
Material	White ABS plastic
Size [mm]	89.5 x 110 x 23.5
Item No.	52847

DVU 1-4 GI

1. Mount the DVU 1-4 GI (LTE) on the wall.
2. Connect the cables to the DVU 1-4 GI (LTE).
3. Cut out the appropriate cable openings. Snap the cover onto the DVU 1-4 GI (LTE) (the cover is shown semitransparent).
